From: personalcoach@ami To: participant1@ami
Subject: Example presentation structure meeting C

- Conceptual specification of user interface
- Trend watching

In this phase you are asked to:

1. Prepare the presentation of the pre-structured PowerPoint slides, which will be send to you by e-mail.
2. Save the PowerPoint slides in the shared folder on your desktop.
3. During the meeting, guarantee that the team reaches a decision on the concepts of the remote controll
4. Remember to stimulate the team.
5. Put the minutes of the former meeting in the shared folder on your desktop.
6. Take minutes during the next meeting.
7. Work on the final report.

We put fashion in electronics

Conceptual Design meeting

Presented by: Fabien, Project
Manager

Agenda

- Opening
- GOAL: Reach a decision on the concept
- 3 presentations (fast)
- Decision on remote control concepts
- Closing (we have 40 minutes!)

Method

- Remote control market research
- Interviews with Paris/Milan based fashion watchers

Real Reaction

Findings – Market Research

- 'fancy' look-and-feel is **HIGHEST PRIORITY**
 - 'functional' no longer important
- Technological innovation is 2nd Priority
 - 2x less important as fanciness
- Easy-to-use is 3rd priority
 - 2x less important as technological innovation

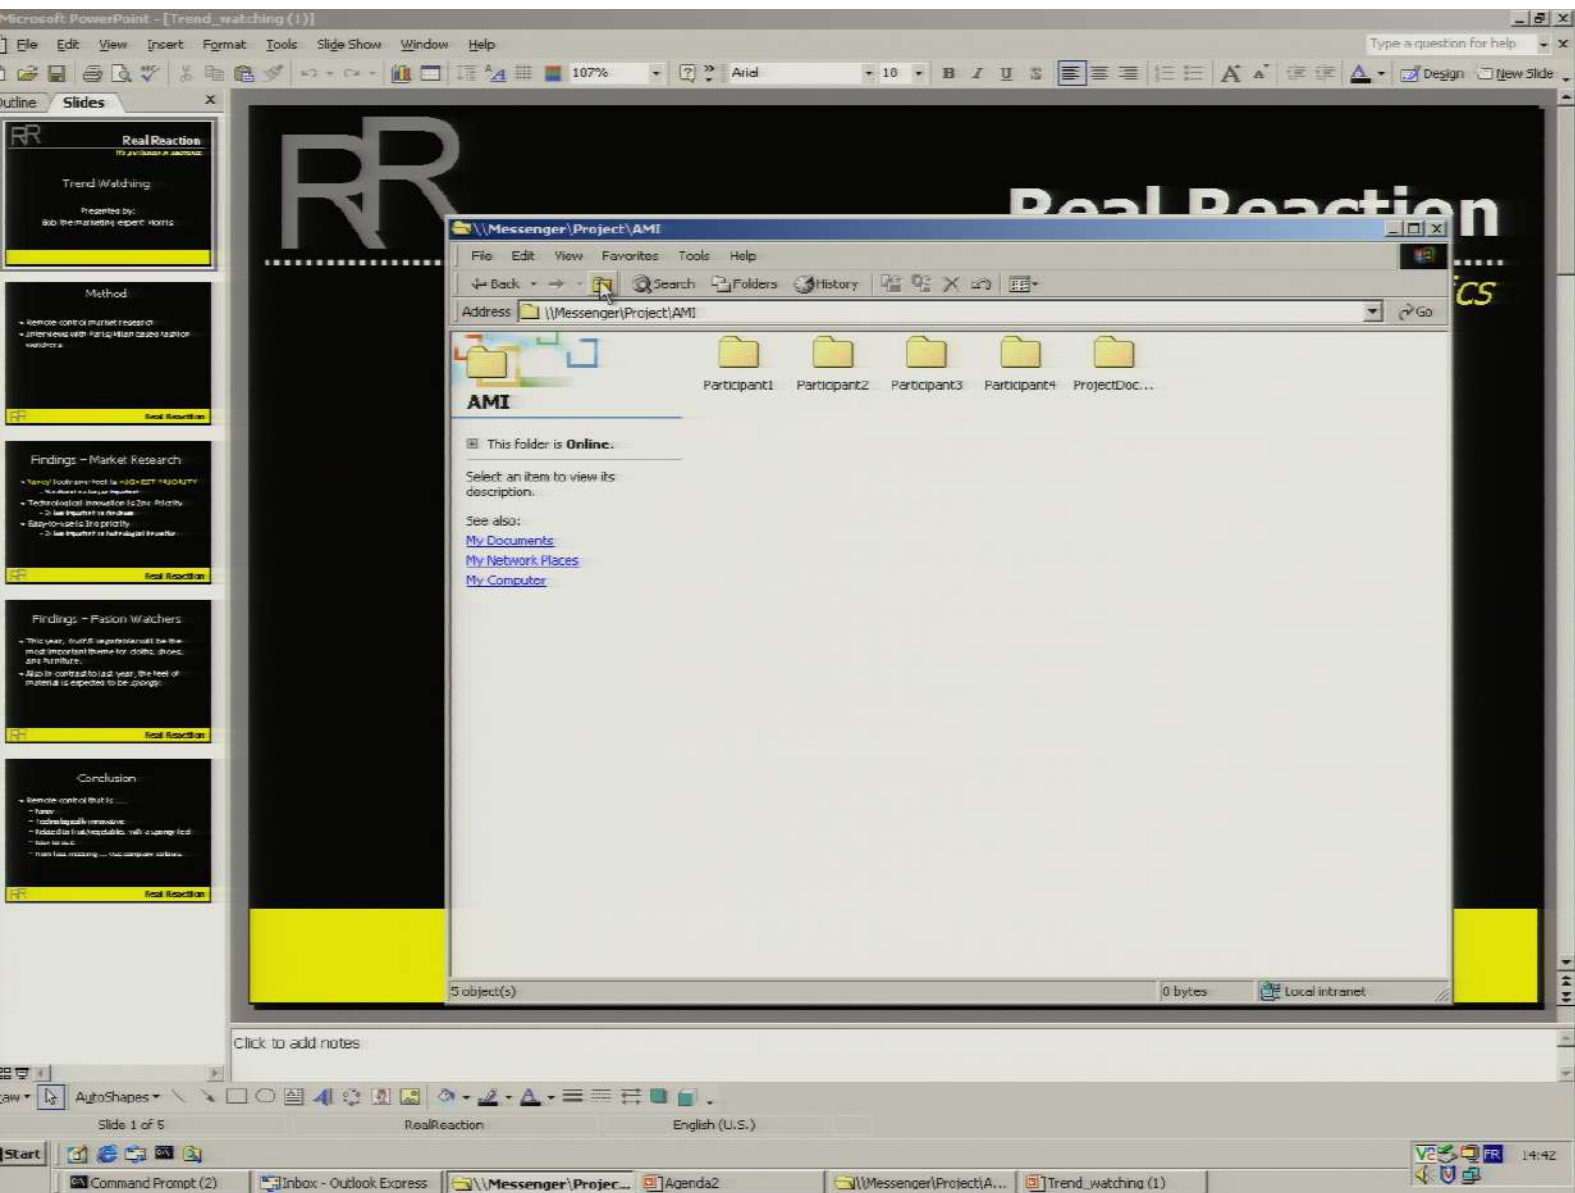

Findings – Fashion Watchers

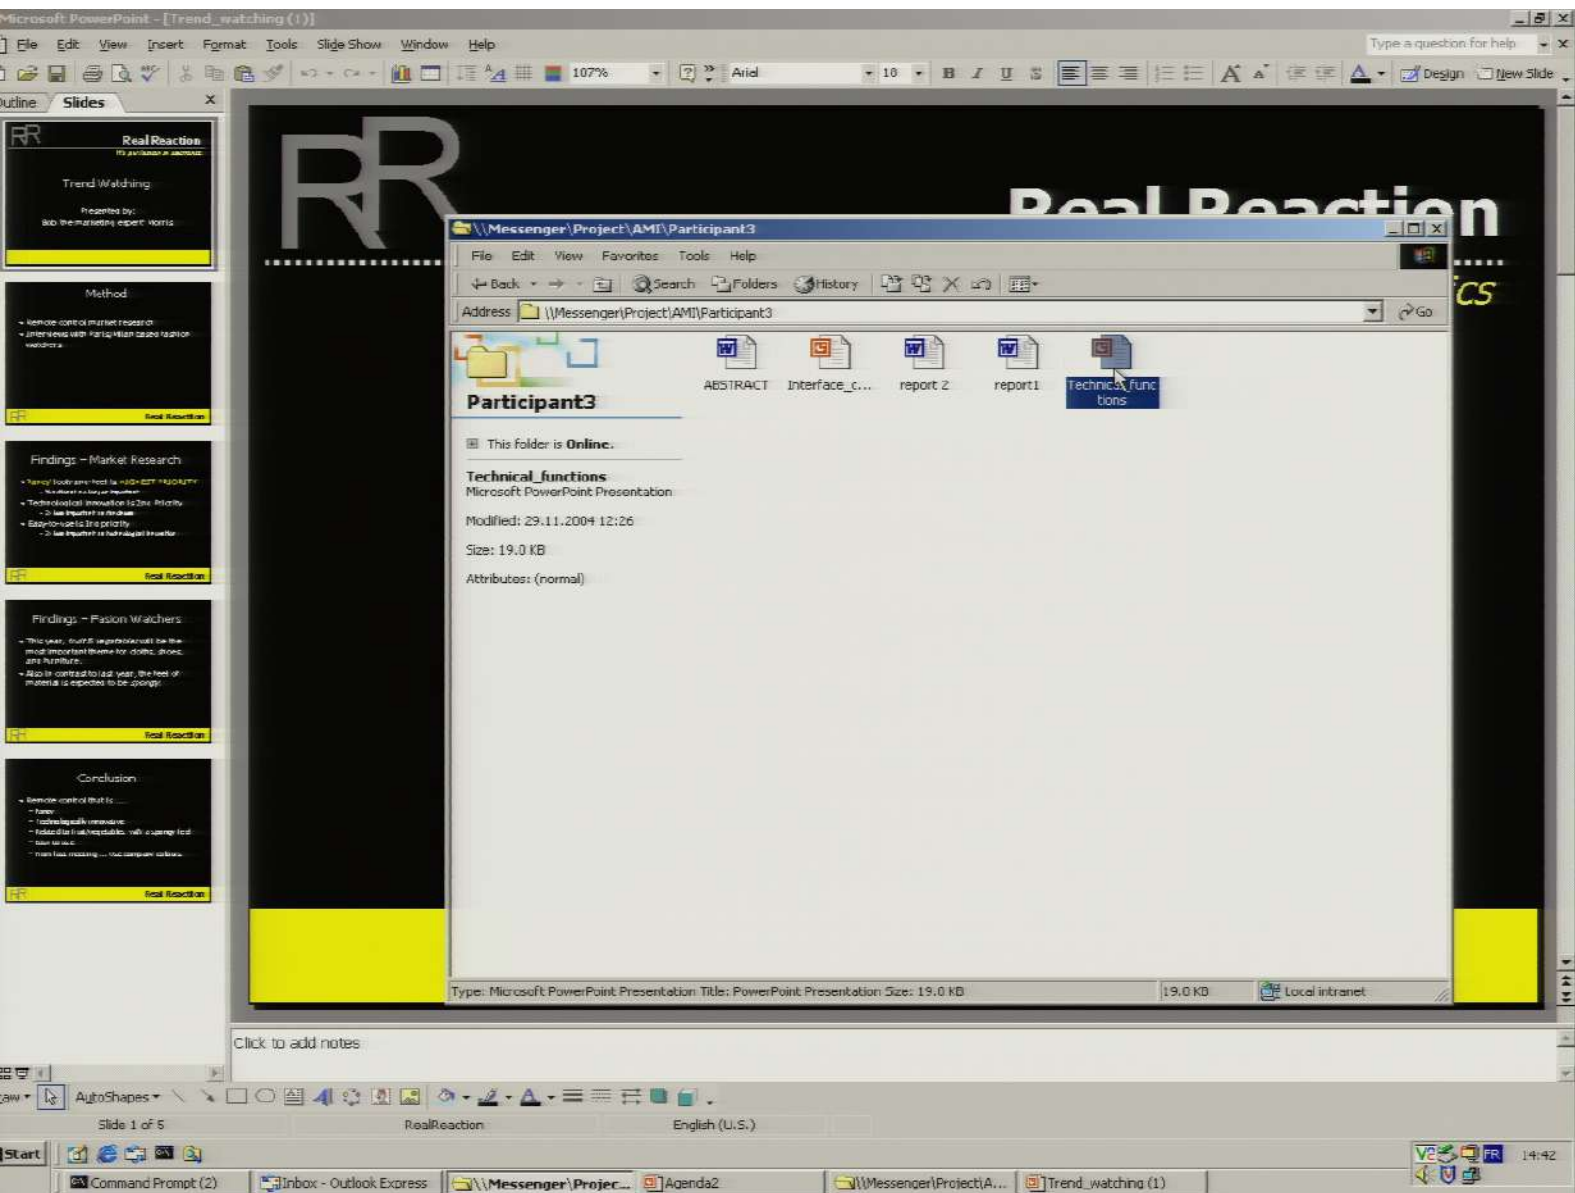

- This year, *fruit & vegetables* will be the most important theme for cloths, shoes, and furniture.
- Also in contrast to last year, the feel of material is expected to be *spongy*.

Conclusion

- Remote control that is
 - Fancy
 - Technologically innovative
 - Related to fruit/vegetables with a spongy feel
 - Easy to use
 - From last meeting ... Use company colours

Technical Functions Design

Presented by: Hamed Ketabdar,
User Interface Designer

Method

- A remote control is an electronic device sending commands by radio waves or infrared to another device.
- If it needs to be connected to a device, it needs to be connected to a device.
- The electronic circuit makes commands.
- The transmitter.

Findings

- Usually, there are two different methods for sending a remote control.
- Remote control based on infrared waves.
- Remote control based on radio waves.
- People prefer to have remote control with bigger buttons.

Personal Preferences

- A remote control with buttons on radio waves.
- Using bigger buttons and less number of buttons.

Method

- A remote control is an electronic device sending commands by waves (Infrared, radio) to another device.
- It consists of different blocks:
 - The interface with buttons
 - The electronic circuit making commands
 - The transmitter

Method

- Design a user interface for remote control, easy to use, no need for learning special functions

Findings

- It is better to put most frequently buttons in the middle of the remote control, they should be also bigger
- The shape of the remote control should be in a way which is comfortable in hand.
Rounded shape corners ...
- Not very eneregy consuming

Personal Preferences

- The less frequently used buttons should be hidden by a cover.
- Some buttons, like volume change can be placed in side of the remote.
- Usage of an speech recognizer

Interface Concept

Prepared by: James Delabarr,
User Interface Designer

Method

- Design a user interface for remote control, easy to use, minimize the learning period, functions

Findings

- It is better to put small frequently buttons in the middle of the remote control, they should be also clear
- The shape of the remote control should be in a way which is comfortable to hold, rounded shape corners
- Not very energy consuming

Personal Preferences

- The least frequently used buttons should be hidden by a cover
- Some buttons, like volume change can be placed in side of the remote
- Usage of an speech recognizer

Personal Preferences

- The less frequently used buttons should be hidden by a cover.
- Some buttons, like volume change can be placed in side of the remote.
- Usage of an speech recognizer
